

# About Us

Meta Skynné is a premium brand specializing in aluminium profiles finished with Japanese wood fiber skin and advanced wrapping technology. We redefine the possibilities of aluminium by combining the strength of metal with the warmth and elegance of natural wood finishes, creating products that are timeless, durable, and sustainable.

35  
YEARS GUARANTEE

**S**trength meets sophistication. Discover the timeless allure of aluminium crafted with precision, offering designs that are as resilient as they are refined. Bring contemporary charm and lasting value into your space with the **B**rilliance.

# Our Vision

To be a global leader in innovative aluminium architectural solutions, delivering products that balance modern aesthetics, functionality, and sustainability.

## Core Values

- **Innovation** —  
Pioneering designs and finishes for modern architecture.
- **Sustainability** —  
Eco-friendly materials with long-lasting performance.
- **Quality** —  
Strict quality checks ensure superior standards.
- **Customer Focus** —  
Tailored solutions for unique client needs.

# *What We Offer*

**Meta Skynné provides a wide range of architectural and lifestyle solutions:**

- Pergolas & Ceilings – Elegant outdoor and indoor coverings with wood-like warmth.
  - Carports – Stylish and durable protection structures.
  - Screen Fences & Gates – Privacy with contemporary aesthetics.
- Façades & Louvers – Enhancing building design and energy efficiency.
- Interior Applications – Wall cladding, partitions, and décor solutions.

## *Why Choose Meta Skynné?*

- Wood-like Elegance, Metal Strength – Best of both worlds.
- Low Maintenance – No painting, polishing, or termite issues.
- Weather & UV Resistant – Perfect for outdoor and indoor use.
- Customizable – Wide choice of finishes, patterns, and profiles.
- Sustainable – 100% recyclable aluminium with eco-friendly finishes.

# FEATURES

1

Tested and compliant with global fire safety standards

FIRE RATED

2

Strikingly beautiful wood fiber skin texture wrapped on aluminium profiles, designed with advanced Japanese wrapping technology. The result is the most realistic and elegant alternative to natural timber

EXPRESSION

3

Tested for fire resistance, UV stability, weathering, peel strength, and scratch protection. Certified results prove the long-term reliability of Meta Skynne profiles for all exterior and interior applications.

EXTENSIVELY TESTED

4

Our collection offers a wide choice of natural wood fiber finishes. From rich tones to subtle matte textures, every profile replicates the depth and warmth of real timber, with realistic plays of light and shadow.

VAST COLOR RANGE

5

Engineered in Japan, Meta Skynne profiles use state-of-the-art wrapping systems, ensuring seamless overlaps, authentic finishes, and unmatched durability

JAPANESE PRECISION

6

Aluminium wrapped with wood fiber skin, Meta Skynne supports eco-friendly construction. Our efficient wrapping and production process ensures minimal wastage and optimized logistics

SUSTAINABLE

7

The combination of aluminium strength and wood fiber skin wrapping ensures resistance against warping, rust, fading, splitting, or peeling. Stable in humid, hot, and coastal climates—immune to insects, mould, and decay.

BUILT TO LAST

8

Unlike natural wood, Meta Skynne profiles need no polishing or repainting. The wrapped wood fiber skin is weather-resistant and easy to maintain—just wipe keeps it looking new.

ZERO MAINTENANCE

9

Meta Skynne profiles are lightweight, precise, and dimensionally stable. Compatible with multiple mounting systems for quick, clean, and secure installations.

EASY INSTALLATION

10

With low LRV (Light Reflectance Value), Meta Skynne profiles minimize glare, making them ideal for modern façades and urban applications

LOW REFLECTIVITY

# PROFILE PALETTE

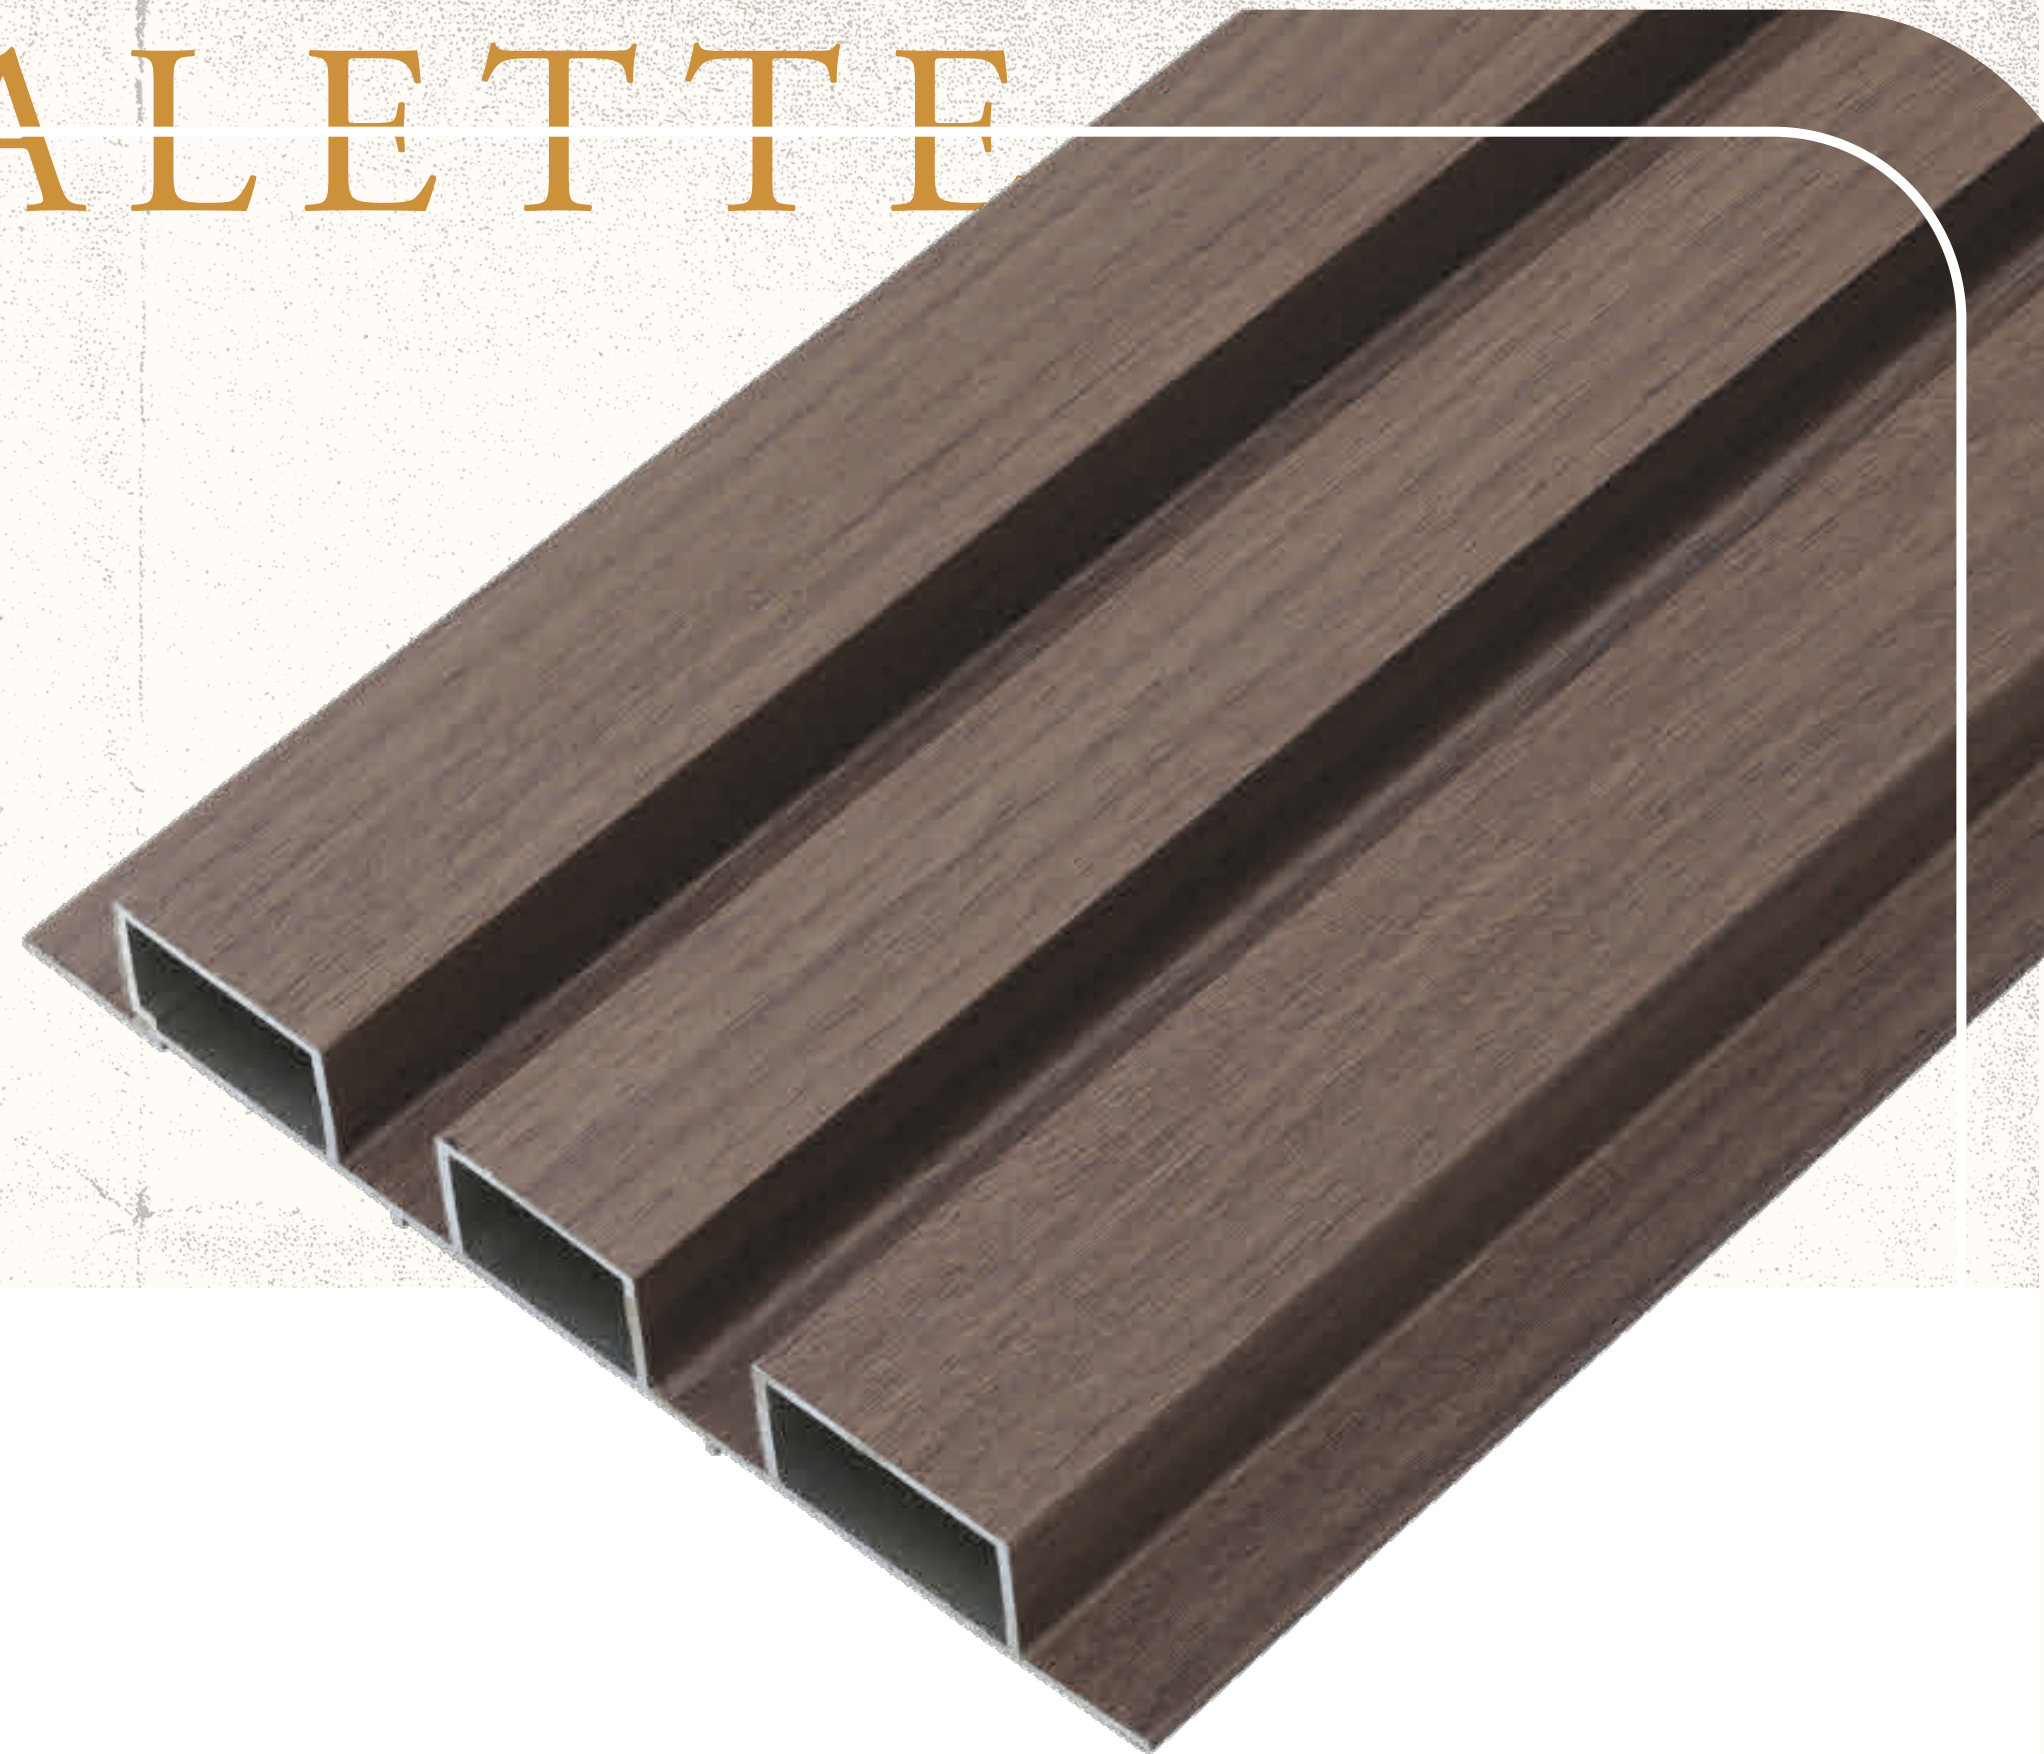

Meta Skynné Triplet is defined by its three parallel grooves that create a bold, rhythmic batten effect. This design adds depth and sophistication, making walls and ceilings appear more structured and dynamic. Crafted from premium aluminium wrapped in Japanese wood fiber skin, Triplet combines strength with natural elegance. Its seamless installation and low-maintenance finish make it a perfect choice for both modern interiors and striking exterior façades.

## TRIPLET

SIZE – 15MM X 115MM

LENGTH – 3.6 METER

AREA PER PLANK – 4.57 SQFT

# PROFILE PALETTE

Meta Skynné Belmont embodies strength and elegance through its bold, multi-groove profile. The structured linear form creates a refined batten effect, offering depth and a powerful architectural rhythm. Crafted from durable aluminium and finished with Japanese wood fiber skin, Belmont blends modern sophistication with the timeless beauty of natural wood. Its precise design ensures seamless installation and low maintenance, making it ideal for both upscale interiors and exterior façades that demand character and durability.

## BELMONT

SIZE - 15MM X 140MM

LENGTH - 3.6 METER

AREA PER PLANK - 5.463 SQFT

# PROFILE PALETTE

Meta Skynné Duo introduces a subtle twin-groove detail that delivers a sleek architectural rhythm to any surface. The design enhances walls and ceilings with depth and modern character, while maintaining a natural, sophisticated appeal. Built from robust aluminium and finished with authentic Japanese wood fiber skin, Duo ensures durability without compromising elegance. Easy to install and effortless to maintain, it's a versatile choice for both residential and commercial applications.

## DUO

SIZE – 15MM X 150MM

LENGTH – 3.6 METER

AREA PER PLANK – 5.83 SQFT

# PROFILE PALETTE

Meta Skynné Barcode stands out with its multiple narrow grooves, creating a bold linear rhythm reminiscent of modern barcodes. This distinctive profile introduces a striking 3D texture that transforms plain surfaces into dynamic design statements. Made from premium aluminium and wrapped in Japanese wood fiber skin, Barcode combines enduring strength with natural wood-like beauty. With effortless installation and minimal upkeep, it's an ideal choice for both contemporary interiors and exterior façades seeking character and precision.

## BARCODE

SIZE - 15MM X 130MM

LENGTH - 3.6 METER

AREA PER PLANK - 4.998 SQFT

# PROFILE PALETTE

The profile design reflects a modern yet natural aesthetic, featuring a sleek rectangular form that highlights precision engineering and minimalism. Its smooth aluminium structure is enhanced with a realistic wood fiber finish, creating a sophisticated blend of industrial strength and organic warmth. The clean, sharp edges emphasize durability and functionality, while the textured wood surface adds character and elegance. This thoughtful design not only ensures structural reliability but also elevates the visual appeal of any architectural application, making it both stylish and enduring.

## RAFTER

SIZE - 50MM X 50MM

LENGTH - 3.6 METER

# PROFILE PALETTE

This aluminum square hollow profile with a wood-finish coating is designed to combine strength with elegance. Its clean, straight edges and refined wooden texture make it ideal for architectural and decorative purposes. Commonly used in pergolas, partitions, fencing, and structural framing, this profile offers both durability and aesthetics.

# FRONT FACADE

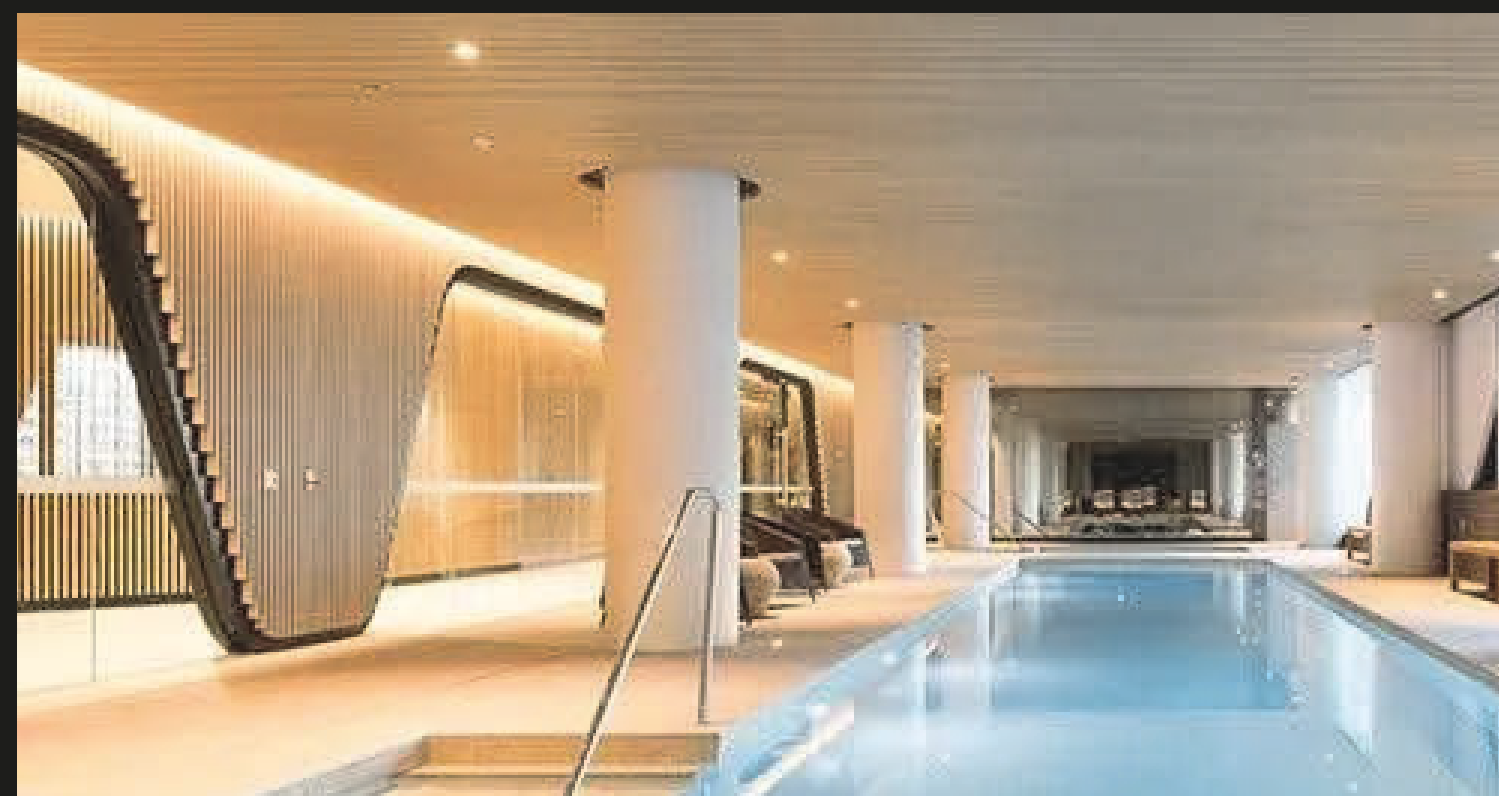

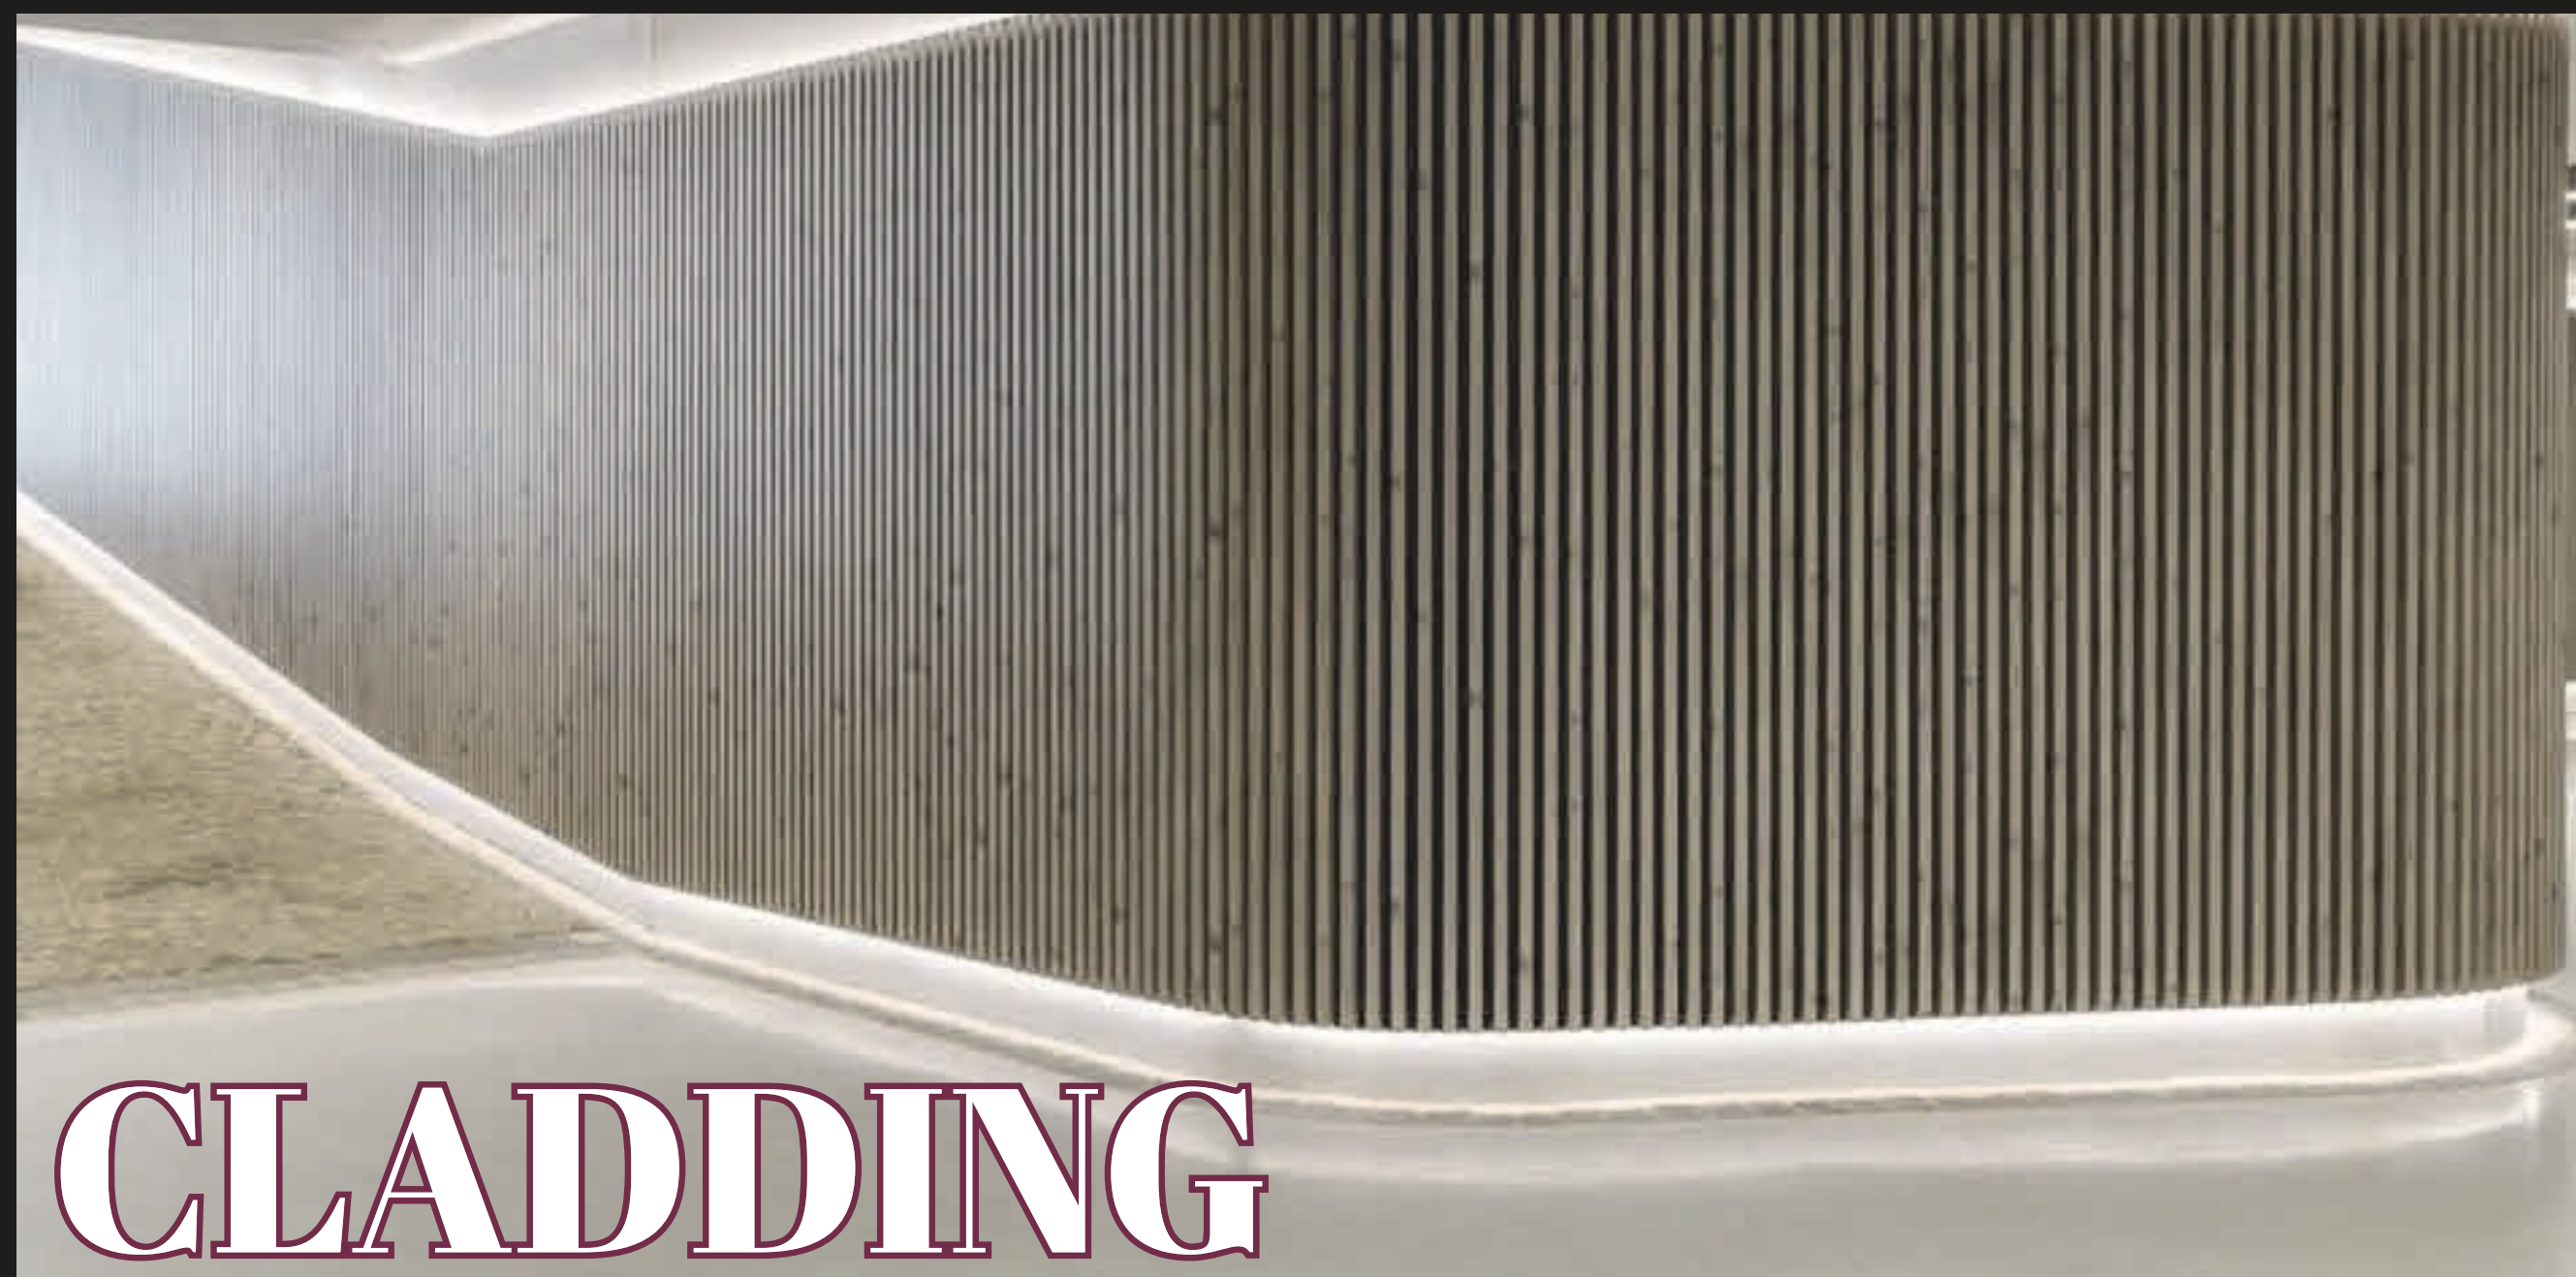

A modern interior space featuring a ceiling made of numerous thin, parallel wooden baffles that create a rhythmic, sunburst-like pattern. The space includes two large white cylindrical columns, a curved staircase with a glass railing, and a lounge area with black armchairs and a white ottoman. The walls are also clad in vertical wooden slats, and the floor is a light-colored polished surface.
