NATWOOD is transfiguring our spaces into a better version of themselves. Whilst everything around us is finding its better, compact, and sleeker version, Natwood ensures the idea sings along with you throughout your living spaces and on every surface, you gaze upon-so there's more room for creativity; more appetite to jazz up the place; most important of all, more breathing space. Our innovative surfaces sit gracefully on a wide diversity of shapes and designs whilst offering enchanting textures that spray a charm on the eyes-we're talking wavy textures, horizontal stripes, delightful squares, and so many designs under the sun which have a wide range of positive moods at their disposal!

Contrary to the solid wood, Natwood is significantly sleeker-as slim as 3.5mm, which is 4-5 times thinner than most of the solid woods. Natwood sheets come in different dimensions, which could be 8x3.5 ft. and 8x4 ft. Our sustainable options cater to every need, big or small; whether you're seeking ways elegance of Thermo Ash, renowned thermal qualities of Thermo Oak, dark and elegant visual magnetism of Walnut Wood, durability and stylish grace of Pine Wood, or say, Teak Wood's unparalleled eye-catching magic spell of the greyish-brown hue.

Natwood is versatile, and it's ready to innovate your floors, walls, ceilings, furniture, doors, homes, offices, restaurant or café, hotel-you name it, we make it sleeker.
